

PRODUCT SPECIFICATION SHEET

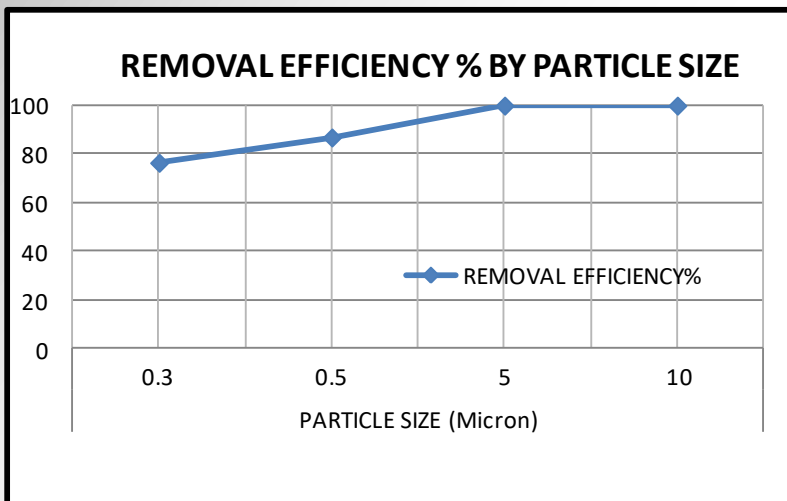

MODEL: 095 High Efficiency Pocket/Bag Filter

DESCRIPTION

The Filter Systems model 095 line consists of extended surface pocket/bag filters ideal for use in applications requiring almost total particulate removal. The product can be used in HVAC applications for dust collection; or in spray booth applications for final filtration of paint overspray, grinding dust or powder coating overspray. Each pocket contains inflation limiters to prevent crowding and each pocket is mechanically fastened around a reinforced wire frame for a leak proof design.

FEATURES

- ✓Effectively 100% efficient capturing particles over 5 micron in size.
- ✓Initial pressure drop of .11" @ 120 FPM.
- ✓Estimated MERV 15 Rating.
- ✓Self-sealing design eliminates air bypass.
- ✓All components rated UL 900 for flammability.
- ✓Available in standard and non-standard sizes as well as in depths ranging from 8" to 24" and between 2 and 8 pockets.
- ✓Synthetic media.
- ✓Thermally stable to 212 degrees F.
- ✓Typically land-fillable (contains no known hazardous materials).
