

PRODUCT SPECIFICATION SHEET

MODEL: NP3P 3PLY Tacky Poly Products

DESCRIPTION

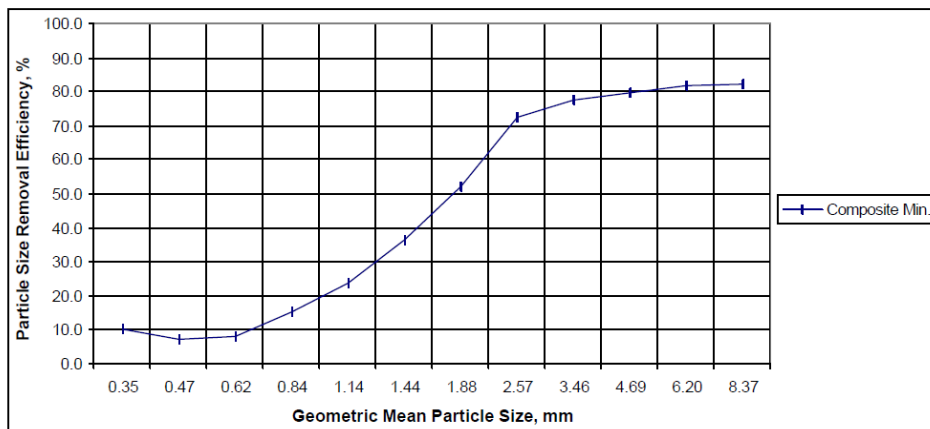

The Filter Systems Model NP3P is a 3 ply dust collection product constructed as either a wire ring panel, wire ring link panel, sleeve, or self-supporting bag/cube. The first layer is a 1" thick dual-ply tackified media and the second layer is a 1/4" thick tightly needled media for final filtration. The two layers are fastened around a wire frame in panel, link or bag/cube configuration.

FEATURES

- ✓ Suitable for a variety of HVAC applications.
- ✓ Initial pressure drop of .38" @ 373 FPM.
- ✓ Estimated MERV 8 rating.
- ✓ Self-sealing design eliminates air bypass.
- ✓ All components rated UL 900 for flammability.
- ✓ Synthetic media.
- ✓ Proprietary, non-drying, non-migrating tackifier applied internally.
- ✓ Thermally stable to 212 degrees F.
- ✓ Typically land-fillable (contains no known hazardous materials).
- ✓ Links are perfect solution for side access tracks and housings.
- ✓ Standard sizes are thermally welded to eliminate needle/thread holes.

TEST

***Actual test report available upon request.
