

PRODUCT SPECIFICATION SHEET

MODEL: PPG Paint Pocket Green Overspray Arrestor

DESCRIPTION

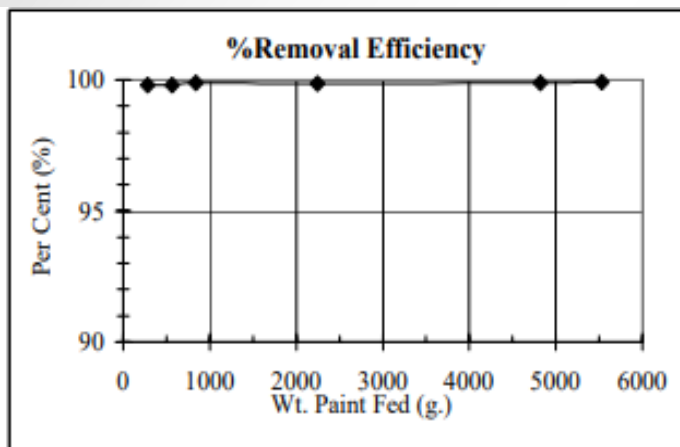

The Filter Systems model PPG is a single stage overspray arrestor that excels in capturing both liquid and powder coating generated in industrial, automotive, and aerospace applications. The three dimensional "pockets" embedded in the front face more than double its surface area. Available in both pads and rolls.

FEATURES

- ✓ Suitable for a variety of overspray applications.
- ✓ 99.43% efficient at capturing 10 micron particles.
- ✓ Initial pressure drop of .06" @ 150 FPM.
- ✓ All components rated UL 900 for flammability.
- ✓ Synthetic media.
- ✓ Thermally stable to 212 degrees F.
- ✓ Typically land-fillable (contains no known hazardous materials).
- ✓ Standard sizes are available in pads or rolls.

TEST DATA

***Actual test report available upon request.
